Sash Window Furniture	2
Casement Window Furniture	4
Front Door Furniture	5
French Door Furniture	8
Rear Door Furniture	10
Glass Spacer Bars	11
Glass Options	13
Paint Finishes	13

Timber Options

Grade A Redwood – Softwood

Traditionally used in the construction of timber windows, our Softwood is treated with preservative to protect against wet, rot dry rot and woodworm. All new frames however always have a Sapele Hardwood Sill as this area takes most of the traffic or weathering.

Sapele – Hardwood

A beautiful hardwood timber suitable for exterior joinery, our Sapele is also treated with preservative to protect against wet, rot dry rot and woodworm.

Accoya – Modified Softwood

Accoya is a brand name for a chemically modified softwood timber. Using the process of acetylation Accoya is guaranteed for a period of 50 years against rot. Its smooth finish paints beautifully and is proven to be less susceptible to movement/shakes and swelling.

Glass Spacer Bars

Inside our double glazed units is an internal spacer that separates the two panes of glass, these are available in either a black or white finish. Please note – windows with new frames come with a “Warm Edge Spacer” to meet current FENSA regulation and replacement windows with original frames are likely to be installed with aluminium spacers. However we will always aim to give you the best (most energy efficient) units possible.

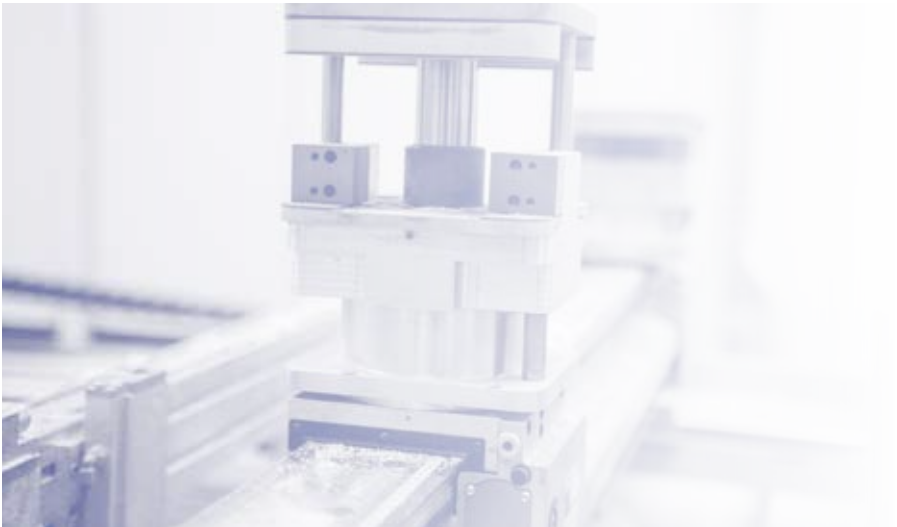

Glazing Bars

Single Ovolo – Bonded

Double Ovolo – Individual

Single Ovolo – Slimline Units
(available dependent on Option and property location)

We fit a Energy Efficient “Softcoat” glass to the inner pane of every double glazed unit that we manufacture this is designed to keep warmth inside the property on a cold day. Also we abide by building regulations and Toughen all glass in critical locations.

Obscure & Patterned Glass
